

We are closely monitoring the rapidly changing news and events surrounding the novel coronavirus (COVID-19). ERB Industries is grateful to state and federal agencies, as well as to the many health officials working to contain the virus. We are following the guidelines from the Centers for Disease Control (CDC) and other government agencies ensuring we make fact-based decisions for our daily operation

We have taken the following actions to address safety for that of our customers, associates and communities. The below will be revised as recommendations and guidelines change.

- We suspended nonessential travel and participation in events, practicing social distancing.
- We suspended pickup of orders at our Woodstock, GA facility.
- Only employees of ERB Industries are allowed in our buildings.
- Safety of workers and cleanliness of our buildings are high priority. We implemented additional sanitization protocols and disinfect high-touch surface areas throughout our facility regularly.
- Our inventory levels remain stable except for respiratory and safety goggles both of which we continue to restock as available, but demand remains high and incoming inventory for these two product lines has extended replenishment dates.

We are open, fully staffed, and here to serve your company and your customers' needs including our Logo.Leader. decoration department. Please contact Customer Service or your Regional Sales Manager if we can be of service. We are here for you!

Stay Safe,

*Your friends at ERB Safety*
